

AKASH DAS

Data Analyst | Python Developer | Machine Learning | Data Science

Location: Angul, Odisha, India

Phone: +91 8144065507

Email: cchiku123456@gmail.com

GitHub: <https://github.com/akhubdev/akhubdev>

LinkedIn: <https://www.linkedin.com/in/akashdastech/>

Professional Summary

Computer Science & Engineering graduate with hands-on experience in Python, SQL, Data Analysis, PowerBI and Machine Learning. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, feature engineering, and model evaluation using tools such as Pandas, NumPy, Matplotlib, Seaborn, and Scikit-Learn. Developed real-world projects in healthcare analytics and web-based applications using Flask. Seeking opportunities to apply analytical and programming skills to solve business problems and contribute to data-driven decision-making.

Technical Skills

- Programming Languages: Python, SQL
 - Data Analysis & Machine Learning: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Feature Engineering, Classification, Clustering, Model Evaluation, Machine Learning
 - Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Flask
 - Tools & Platforms: Power BI, Git, GitHub, Jupyter Notebook, VS Code
-

Projects

HealthGuard AI – AI-Powered Healthcare Assistant

GitHub: <https://github.com/akhubdev/HealthGuard-AI>

Developed a web-based healthcare assistant using Python, Flask, and Machine Learning concepts.

- Built an interactive interface to assess diabetes risk based on user health information.
- Implemented data preprocessing and prediction workflows for healthcare analytics.
- Developed backend functionalities using Flask for handling user requests and model integration.
- Utilized Git and GitHub for version control and project management.

Tech Stack: Python, Flask, Machine Learning, Data Analysis, Git, GitHub

Thyroid Disease Classification using Machine Learning

GitHub: <https://github.com/akhubdev/Hypothyroid-Classification>

Developed a machine learning model to classify thyroid disease using the UCI Hypothyroid dataset.

- Performed data cleaning, missing value handling, exploratory data analysis (EDA), and feature engineering.
- Implemented and compared multiple classification algorithms including Decision Tree, Random Forest, and CatBoost.
- Evaluated model performance using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.
- Created data visualizations and analytical insights using Matplotlib and Seaborn.
- Achieved the best classification performance using the CatBoost model among all evaluated models.

Tech Stack: Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, Machine Learning

Internship Experience

Data Science, Machine Learning & Deep Learning Intern
Syllogistek Systems Private Limited | June 2025

- Completed internship training focused on Data Science, Machine Learning, and Deep Learning using Python.
 - Worked with real-world datasets involving data cleaning, preprocessing, analysis, and machine learning workflows.
 - Gained hands-on experience in Exploratory Data Analysis (EDA), feature engineering, model development, and evaluation.
 - Contributed to AI/ML-based project implementations and practical problem-solving tasks.
 - Strengthened Python programming, data analysis, and machine learning fundamentals through project-based learning.
-

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Adarsha College of Engineering, Angul, Odisha
Affiliated to Biju Patnaik University of Technology (BPUT), Odisha

CGPA: 8.3/10
Graduation Year: 2026

Certifications

- Data Science, Machine Learning & Deep Learning Using Python Syllogistek Systems Private Limited | June 2025
Certificate ID: SYL-2025-ML1-46
- Data Analytics Certification Program (Ongoing)
Coding Ninjas | Expected Completion: Jan 2027
